With sites in Dresden and Frankfurt, CTF SOLAR GmbH is a leading developer and supplier of CdTe technology for thin-film solar modules. We take processes developed on a laboratory and pilot scale and turn them into industrial production techniques, teaming up with specialised partners to design the corresponding machinery.

CTF SOLAR GmbH constructs turnkey production lines for manufacturing thin-film solar modules all around the globe. This involves planning and implementing the entire process chain on site, from selecting and procuring raw materials through to packaging the end product ready for delivery. Operations recently got under way at our first factory in Chengdu, China, with an annual capacity of 100 MW_p. Construction work has begun on others with a combined capacity of 500 MW_p.

Currently with around 50 employees from over ten different countries, CTF SOLAR GmbH is fully owned by Chinese company CTIEC, one of the world's Global Top 200 Engineering Companies based in Shanghai.

To support our further growth accordingly, we would like to expand our team in Dresden and Frankfurt a.M. and are therefore looking for a:

Engineer for Inline-Metrology (m/f/d)

Your responsibilities:

- Development of design and process changes to improve metrology equipment performance
- Technical lead and interface to equipment supplier (OEM)
- Support installation- and ramp up phase at customer sites worldwide
- Specification of new equipment and process
- Coordinate suppliers and support customers engineers during troubleshooting
- International travel approx. 25%
- Participating in all tests and events involved in accepting machines and preparing all relevant reports

You must ...

- hold a university degree in sciences, engineering or a similar subject
- have a proven track record as a successful metrology engineer or person responsible for inline measurements and quality control
- have a good command of MS Office
- have technical expertise and be passionate about solving technical problems
- be prepared to carry out detailed work and have intrinsic motivation; work diligently
- be able to think logically and organise yourself to a large extent; have strong organisational skills
- have good communication skills and be willing to cooperate
- be fluent in German and English
- have experience in working in interdisciplinary, international teams
- be very willing to travel and have an interest in other cultures

What we're offering:

- Exciting projects on tomorrow's energy technology
- The opportunity to work in an ambitious, international team
- Individual opportunities for further training
- A corporate culture in which you can contribute your own ideas and use your initiative

How to apply:

If we have sparked your interest, please send us your application documents in German or English, including your earliest possible start date and details of your salary expectations, to the following address: HR@ctf-solar.com
