With sites in Dresden and Frankfurt, CTF SOLAR GmbH is a leading developer and supplier of CdTe technology for thin-film solar modules. We take processes developed on a laboratory and pilot scale and turn them into industrial production techniques, teaming up with specialized partners to design the corresponding machinery.

CTF SOLAR GmbH constructs turnkey production lines for manufacturing thin-film solar modules all around the globe. This involves planning and implementing the entire process chain on site, from selecting and procuring raw materials through to packaging the end product ready for delivery. Operations are underway in our first high volume manufacturing factory in Chengdu, China, with an annual capacity of 100 MW_p and a second factory project is about to start production at end of 2020. Construction work has begun on other Fab projects with a combined capacity of > 500 MW_p.

Currently with around 55 employees from over ten different countries, CTF SOLAR GmbH is fully owned by Chinese company CTIEC, one of the world's Global Top 200 Engineering Companies based in Shanghai.

To support our further growth, we would like to expand our Engineering team in Dresden and are therefore looking for a:

Engineer for Vacuum Deposition Processes (f/m/d)

Job description:

- Provide specifications of vacuum deposition equipment and processes to meet the requirements of our solar manufacturing technology
- Process development and scale up from R&D to high volume manufacturing level
- Technical lead and interface to equipment supplier (OEM)
- Support installation- and ramp up phase at customer sites worldwide
- Coordinate between suppliers and customer support engineers for continuous process development
- International travel approx. 25% (predominantly in China)

About you:

- Degree in a relevant engineering discipline or natural science
- Experience in equipment or process engineering for vacuum deposition, such as CVD or PVD
- Analytical approach, preferably with experience in successful problem solving and troubleshooting
- Open to work in an international team
- Self-directed, with pro-active approach to problem solving, hands-on mentality
- Knowledge of SPC tools, CAD related software and documentation control is a plus
- Fluent in English, knowledge in German and/or Chinese is a plus

What we're offering:

- Exciting projects in solar energy
- The opportunity to work in an ambitious, international team
- A flexible, international and cooperative working environment
- Individual opportunities for further training and development
- A corporate culture in which you can contribute your own ideas, use your initiative and actively help to design processes

How to apply:

If we have sparked your interest, please send us your application documents in German or English, including your earliest possible start date and details of your salary expectations, to the following address: HR@ctf-solar.com
